These are the bills that passed both the Senate and Assembly and made it to the Governor's Desk

BILLS SIGNED INTO LAW BY GOVERNOR BROWN:

AB 48: Bans Large Capacity Magazines/Conversion Kits - Beginning on January 1, 2014, anyone who purchases and/or brings into the State of California a collection of parts that can be assembled into an high capacity magazine will be in violation of the law.

AB 170: Expands Assault Weapons Restrictions & Permit Requirements - Beginning January 1, 2014, this law affects only training and security companies who acquire assault weapons permits from the Department of Justice.

AB 231: Requires Guns to be Locked Up - Beginning January 1, 2014, this law imposes liability if a person negligently stores or leaves a loaded firearm in a place where he or she knows that a child is likely to access it.

AB 500: Requires Guns to be Locked Up & Extends Background Checks to 30 Days - Beginning January 1, 2014, this law requires gun owners to lock up their guns if they reside with a prohibited person and allows the Department of Justice 30 days to drag their feet in approving a background check.

AB 711: Lead Ammunition Ban - Amendments recently taken to this law extends the time period of implementation from July 1, 2018 to July 1, 2019. Existing requirements in the present condor range continue. Requires that the prohibition of the use of lead ammo shall be temporarily suspended upon finding that no non-lead ammunition is available in that caliber or the Federal Government considers it armor piercing. If either of these become the case, the determination of this law's enforcement will be at the whim and sole discretion of the appointed Director of the Department of Fish and Wildlife. This law sets in stone the building blocks of a total hunting ban by 2019. The costs of non-lead ammunition has been documented to be at least double the expense of the most popular loads of hunting ammunition containing lead. The law was sponsored by the Humane Society of America, who has openly stated their goal of banning hunting across the board, thus, this is a major step in accomplishing their goal.

SB 683: Requires Safety Certificate for Any Firearm Purchase - Beginning January 1, 2014, this law requires all firearms purchasers to take a firearms safety certificate test, which includes both long gun and handgun components. If you are purchasing a handgun and have already passed the handgun safety certificate test, your certificate will still be valid until it expires, as usual. However, if you are purchasing a long gun, you will now be required to take a safety certificate test that will encompass the handgun safety information as well. This certificate will be valid for 5 years. Even if you never intend on purchasing one or the other types of firearms, you will still be required to pass a test in order to receive your gun.

VETOED:

SB 374: Banned Semi-Automatics

SB 475: Banned Gun Shows at the Cow Palace - This is a bill that Senator Mark Leno has introduced year after year, regardless of the Governor's continued vetos. The Senator wants to ban gun shows from a public facility,

SB 567: Revised the Definition of a Shotgun - Would have basically, only banned one known shotgun that was based on a late 1800's design.

SB 755: Expanded the list of misdemeanors to include some intoxication & controlled substance crimes that prohibit the purchase and possession of firearms

AB 169: Banned Private Party Transfers of Handguns Legally Purchased Prior to the "Safe Handgun List" - Would Have Banned Transfers to Your Kids, etc

AB 180: Allowed the City of Oakland to Make Own Gun Laws - If this bill would have passed, other cities would have certainly followed suit, which would have made innocent, law abiding citizens criminals, upon crossing borders from one city to another.
